NETSCOUT™

Brian McCann

Vice President and General Manager Packet Flow Switch Business

Brian McCann came to NetScout through the acquisition of ONPATH Technologies in 2012. As CEO of ONPATH, Brian was responsible for the vision, growth strategy, and total leadership of the business, increasing revenues nearly fivefold during his tenure, and dramatically increasing new product investments to further grow the addressable applications for the company's core technologies. Mr. McCann was the founding President of the U.S. Division of ADVA Optical Networking. He was also the Chief Sales and Marketing Officer of the global organization. During his tenure from 1996 to 2008, the North American business grew to over 250 people achieving over $100 million in revenues as global revenues exceeded $350 million. Mr. McCann spent nine years at 3M Corporation, and served on the Board of Directors of Nexxus Lighting. He regularly speaks at technology and entrepreneur conferences.

Mr. McCann holds a Bachelor of Science in Ceramic Engineering and Fiber Optics Program from Rutgers University in Piscataway, N.J.
