

SNIFFER® | GLOBAL

Top 10 Reasons to Use Sniffer® Global

The industry's first enterprise-class portable network analyzer

Sniffer® Global is the industry's first truly enterprise-class portable network analyzer. It delivers the same great on-demand monitoring, packet capture and problem analysis for wired and wireless network segments as the Sniffer Portable Professional to help IT organizations speed time-to-knowledge, improve service delivery and enhance user experience, but Sniffer Global also includes other robust features detailed below to help control and manage access to confidential corporate information traveling over the network.

Sniffer Global enables distributed organizations across the world to:

1. **Prevent tool misuse:** Avoid potentially devastating misuse of protocol decode functions with unique Sniffer Global controls and tool security
2. **Close security loopholes:** Centralized usage controls on a per-user/per-role basis limit who can access what functionality and network segments with the Sniffer tool—protecting sensitive packet payloads during decode
3. **Audit user activity:** Automated reporting and auditing tracks every action taken with Sniffer Global –online and offline
4. **Detect “problems in motion”:** Accelerate problem resolution in wireless networks through integration with the Cisco® 3300 Series Mobility Services Engine (MSE), which displays the physical location of wireless devices in context with relevant wireless performances metrics
5. **Speed identification of rogue devices:** Improve security and performance of mobility environments with on-the-ground security reports, identifying high-risk devices, rogue access points, and mis-configured security settings
6. **Simplify administration:** Centralized license, upgrade and patch management eases updates across distributed enterprises
7. **Leverage investments cross-functionally:** Flexible licensing options facilitate use by multiple IT audiences, including network administrators, field service technicians, security engineers and software developers
8. **Assure consistency:** Modular decode and Expert packs guarantee all users have access to the most up-to-date software
9. **Protect your investment:** Get direct access to NetScout support services for all Sniffer Global users with a valid MasterCare contract
10. **Save money:** Get the 10-user Sniffer Global license for the same cost as eight single-user Sniffer Portable licenses
