

OVERVIEW

Course Level:

Introductory

Format:

Online, recorded

Course Code:

TRN-XG-ODLS

Prerequisites:

- Students must have a working knowledge of LAN technologies and topologies, the OSI reference model, and the function of network devices

On-Demand Learning Series

OptiView XG Network Analysis Tablet

Course Description

The On-Demand Learning Series is a set of recorded sessions that describe how to use the OptiView® XG Network Analysis Tablet. Recorded by NETSCOUT® University subject matter experts, each lesson outlines the key aspects of the OptiView XG. The online, recorded format allows students to attend at their own convenience, 24/7. Students can start and stop the series at any time and return when time permits.

The series consists of three modules. Each module has three to five fifteen-minute (approximate) lessons dedicated to specific functionality in the OptiView XG. A short testing section at the end of each module validates that students absorbed the important concepts in all of the lessons. Students who successfully complete the three exams earn the NCA (NETSCOUT Certified Associate) certification.

The course describes the OptiView XG's capabilities and presents suggested workflows to solve typical problems. Everything that you need to know about setup and operation, including a physical overview, fine tuning settings for your wireless environment, network discovery, and creating dashboards, is presented.

Course Objectives

- Describe the physical layout and connections of the OptiView XG
- Configure network ports and remote access
- Administer discovery of network interfaces, including SNMP connections
- Manage user configuration and profiles
- Navigate and configure the home screen and panels
- Create dashboards to optimize monitoring and troubleshooting
- Troubleshoot issues using network discovery and path analysis
- Visualize the network utilizing the Network Map and device details

Course Syllabus:

Module One

- Lesson 1 – OptiView XG Physical Overview
- Lesson 2 – Remote Access and Configuration
- Lesson 3 – Network Port Configuration Part 1
- Lesson 4 – Network Port Configuration Part 2

Module Two

- Lesson 1 – Discovery Configuration
- Lesson 2 – SNMP Configuration and Extended Discovery Ranges
- Lesson 3 – User Configuration, Remote Access, and Profiles

Module Three - Troubleshooting

- Lesson 1 – Home Screen Overview and Configuration
 - Lesson 2 – Home Screen Panel Overview
 - Lesson 3 – Dashboard Review and Creation
 - Lesson 4 – Network Discovery
 - Lesson 5 – Network Map and Device Detail
-

Certification

Exam Code: OptiView XG, v14.0

Format: Online, multiple choice

Availability: Worldwide, English

Exam Fees: Active MasterCare customers may register for and take the On-Demand Learning Series and corresponding exams for free

- **Enrollment** – All students who register for and successfully complete the On-Demand Learning Series are eligible to take the corresponding OptiView XG, v14.0 certification exams.
- **Preparation** – The exams are designed to measure students' retention of key lesson objectives after completion of each module. Students are encouraged to pay close attention when they are listening to each lesson.
- **Procedure** – There is one exam for each of the three modules. After completing a module, students can take the exam for that module. Each exam has nine to fifteen multiple choice questions chosen from a larger pool of questions. For each test, a score of seventy percent is required to pass. If a candidate does not pass on the first try, two additional retakes are allowed.
